

OUSE VALLEY NATURE RESERVE  
REPORT FOR S.C.P. A.G.M.

This Project has, by its very nature, moved at a measured pace. Progress is dependent on acquiring land from the Port Authority and the White family, who own or lease the land needed. The Port Authority is amenable to releasing their land but, in return, seek planning permission for another site. Should the land be secured for the Project, it would pass into public ownership as part of the new Nature Reserve. The Reserve is envisioned as an educational facility, a draw for tourists and a response to climate change.
